Hard Skill

- Web Developer - HTML, CSS, JS, Bootstrap and JQuery
- Computer Programming - C/C++ (Basics)/Java/Python
- Blender artist
- Game Developer
- Photoshop / Premiere-pro
- AR developer

Soft Skill

- Communication
- Team-work
- Adaptability
- Problem solving

Education Background

- NIST Institute of Science and Technology
BTech in Computer Science and Engineering
Currently in my 3rd year
- Times Scholars Gurukul
+2, Central Board of Secondary Education
Completed in 2020
- Times Scholars Gurukul
10th, Central Board of Secondary Education
Completed in 2018

About Me

A passionate front-end web developer currently pursuing my B.Tech in Computer Science and Engineering (CSE) at NIST. With a strong foundation in programming and a keen eye for design, I am dedicated to crafting engaging and user-friendly web experiences.

As a young and motivated individual, I am always eager to take up new challenges and explore opportunities to grow both personally and professionally. I believe in the power of teamwork and collaboration, and I am open to working with others to create meaningful and impactful projects.

Projects

Amazon Clone - <https://asutosh2072.github.io/Amazon-clone/>

I wanted to accurately reproduce the visual style and layout of the well-known e-commerce site Amazon with this project. Although it lacks the original's dynamic capabilities or server-side scripting, it nevertheless serves as an example of my proficiency in frontend web programming.

Drum Kit - <https://asutosh2072.github.io/Drum-Kit/>

In this project, I have created a drum kit sound effects application using HTML, CSS, and JavaScript, which allow users to generate music instrument sounds by clicking on specified keys or buttons on the screen.

Simon Game - <https://asutosh2072.github.io/The-simon-game/>

The Simon Game is a popular electronic game from the 1980s, where players must memorize and reproduce a sequence of colors and sounds.

Netflix Clone - https://asutosh2072.github.io/Netflix_clone/

This project is a Netflix clone created using HTML, CSS, and JavaScript. It replicates the visual and interactive aspects of the popular streaming service, allowing users to browse through featured content, explore different movie categories, and experience a familiar Netflix-like interface.

NIST Guide (Currently working on this)

A website to help students with their academics

Key features:

- one-stop destination for academic resources and support. My website aims to assist students in their studies by providing a wide range of helpful materials, including notes and previous year question papers.
- With a user-friendly design and intuitive layout, navigating through the website is a breeze.

Achievements

- | | |
|------|---|
| 2022 | Got certified in Programming, Data Structures and Algorithms using Python |
| 2023 | Got certified in Introduction to programming in C |
